

REVENUE PATH 01

White-Label Enterprise Concierge

A branded XPMatch embedded on a destination's own website,
sold as an annual contract.

The claim, and the check

Arithmetic verified. Inputs tested against published prices, September 2026.

YOUR CLAIM

\$1.2M ARR

20 clients at \$5,000 per month.

The arithmetic is exact: $20 \times \$5,000 \times 12$.

WHAT THE RESEARCH SAYS

Price: sound
Count: 8-17%

The price band is credible. But 20 clients is 8-17% of every DMO on earth with the budget to buy this.

What the market actually pays

[V] = verified against a cited public source · [E] estimated · [A] assumed

1	DMOs worldwide	~2,400	[V]
2	Marketing budget → web, SEO, content, CRM	15-28%	[V]
3	Budget implied by a \$60k/yr contract	\$1.1-2.0M	[V]
4	DMOs that raised digital spend in 2026	41%	[V]
5	GuideGeek's DMO partners (with a media brand)	30+	[V]

THE BINDING CONSTRAINT

**Only ~240 destinations
on earth can afford this.**

GuideGeek reached about 30 — and it arrived with a media brand, 1.5M users and editorial credibility.

XPMatch would arrive with zero reference customers.

The model

Base scenario from 5-revenue-paths-model.xlsx. Change a driver and this moves.

Year 3 revenue

\$324,000

Year 3 gross profit

\$297,000

Year 3 margin

92%

Year-3 FTE required: 1.13

What has to be true

Three conditions. If any fails, the path does not deliver.

1

Land the first 6 clients by end of Year 2

At \$3,000/month each. The first is the hardest and unlocks the rest as references.

2

Ship the white-label build

Multi-tenant theming, client admin, SSO, SLAs. 6–10 weeks. It does not exist in the codebase today.

3

Accept the procurement cycle

DMOs buy on annual budget cycles through RFPs. A deal signed in month 3 may not bill until month 12.

VERDICT

The strongest strategic path of the seven.

90%+ margin, recurring, and precisely the asset an advisor platform or OTA pays a premium for.

Slow to start. Compounds hard.
